SUMMARY

Engineer-turned-Product Manager with **7 years of shipping B2B SaaS and B2C products** that move business metrics. Takes products from floor-level discovery to production across compliance, retail, restaurant technology and manufacturing — owning the metric the product is judged on, not just the backlog.

SKILLS

Product	Discovery & user research, PRDs and user stories, roadmapping & prioritisation, A/B testing, release management, GTM and product marketing, competitive analysis, stakeholder management
AI Tools	Claude, Gemini Enterprise, Emergent, Replit, ElevenLabs
Data	SQL, Mixpanel, Power BI, cohort & funnel analysis, metric design, customer data analysis
Design	Figma, Miro, Excalidraw, wireframing, design systems, user journeys, prototyping
Domains	Compliance & GRC SaaS, retail & merchandising, restaurant tech, apparel manufacturing, procurement

EXPERIENCE

Sr. Product Manager (Sr. Outcome Manager) devX AI Labs ·	May 2026 – Present Bengaluru, Karnataka
- Own the business outcome end to end on enterprise engagements - baseline the current state, define one metric and one named owner per process, and carry the work from discovery through to production. - Lead the design and development of Gemini Enterprise (GE) agents for requirements across industries - retail, apparel manufacturing and media - from use-case discovery and agent design through build, evaluation and rollout to client teams. - Led solution of PLM software for a premium apparel retailer working 35+ stores within India and outside India and automated manual process across 10+ teams. - Designed Ops Core, the planning and product-lifecycle layer around the client's existing ERP and POS. - Designed production-execution features for an apparel manufacturer cutting SMV drift from 15-20% to under 3% and returning an estimated 520-600 supervisor hours a year. - Improved online website conversion of an Indian luxury apparel brand by enhancing cart checkout flow and adding an agentic layer. - Authored the Retail Practice capability brief and RetailOS pitch, mapping retail across online, offline and agentic surfaces; now the standing artefact in client pitches and new-logo conversations.	
Product Manager Sprinto ·	May 2024 – May 2026 Bengaluru, Karnataka
- Led product initiatives across UX and design systems for 3 product pods, standardising experiences and reducing design inconsistencies by 40%. - Shipped a rule engine and universal search, and embedded analytics across the product - giving the team decision data it had been operating without. - Applied AI to testing and auditing workflows across large-scale modules, cutting manual effort in the highest-volume part of the product. - Rebuilt customer training and enablement against evolving compliance frameworks: training completion up 45% and audit-readiness scores up across enterprise accounts. - Introduced release management as a standing process, streamlining phased launches and cross-functional coordination on feature delivery. - Optimised Jira workflows and built integration dashboards that gave leadership delivery visibility and lifted team efficiency. - Grew newsletter and product-communication engagement through targeted content and data-driven optimisation.	
Product Manager Cyntra Labs ·	Aug 2023 – May 2024 Noida, Uttar Pradesh
- Took a voice-enabled self-ordering kiosk from concept to rollout for a restaurant chain with 500+ locations across India. - Built a customer feedback system for a European retail chain with 2,000+ global outlets, lifting engagement across the estate. - Introduced QR-code ordering in food courts - several outlets in one cart - cutting order time by 40%. - Drove an analytics mobile app that improved UX and sales-metrics analysis for store and area teams. - Ran product marketing with email lead magnets, converting 42% of leads into product demos. - Presented at GITEX 2023, Dubai, expanding the client and partner pipeline.	

Senior Product Analyst

Dec 2021 – Jul 2023

Posist Technologies Ltd. ·

New Delhi, India

- Led a B2B SaaS platform for international restaurant chains with **800+ outlets**, spanning front-of-house, billing, analytics, CRM and back-of-house operations.
- Owned a **mobile inventory application** and the core analytical emailer end to end - UI/UX through launch - reaching **1,600+ users**.
- Cut delivery bottlenecks by **83%** by using cohort analysis to find where work actually stalled, then reshaping the process around it.
- Managed a cross-functional team from inception to implementation and ran third-party integrations.
- Designed the incident, feature-request and integration processes that multiple teams still operate on.

Senior Software Engineer

Sep 2019 – Dec 2021

Infosys Ltd. ·

Pune, Maharashtra

- Built SAP Native HANA / BusinessObjects solutions for a leading German investment firm, covering data modelling and ETL.
- Reduced report-related bugs and incidents by **78%** through query and model optimisation in HANA.
- Contributed to internal marketing with case studies, presentations and technical blogs.

Co-Founder

Aug 2016 – Sep 2018

Karyavahi · B2C civic app, with Dept. of IT, Govt. of Rajasthan

Jaipur, India

- Led a team of 4 to build a native app for anonymous civic complaint submission with sentiment analysis, routed automatically to the responsible authority.
- Selected in the top **0.04%** of applicants for the Rajasthan Student Startup Exposure Program; pitched to the entrepreneurship cells of **Stanford, UC Berkeley and Northeastern**.

SELECTED PROJECTS

- **Ops Core (B2B)** Planning and product-lifecycle system for a premium apparel retailer - one design-code master across made-to-measure and inventory, demand and option-health planning, pre-production and allocation, around an existing ERP and POS estate.
- **Inventory & Analytics Suite (B2B)** End-to-end inventory and sales-analytics applications for an enterprise with 1,000+ outlets in India, from use cases through to shipped product.
- **Karyavahi (B2C)** Social platform for civic issues - complaints raised in-app, processed through a pipeline and routed to authorities. Selected in the top 3 of 7,000 applications in the State.
- **ReBin (B2C)** Problem framing, user journeys and end-to-end design for a doorstep pickup app that helps households refurbish, recycle or resell what they no longer use.

EDUCATION & CERTIFICATIONS

Bachelor of Technology, Computer Science - JECRC Foundation, Jaipur

2015 – 2019

Advanced Product Management (Cole Mercer) · Machine Learning, Coursera (Andrew Ng) · Everyday Leadership, University of Illinois · Infosys Certified Agile Developer

AWARDS & ACHIEVEMENTS

- Nominated for the **Karmaveer Chakra Award 2019**, instituted by the **United Nations** and **IIT Delhi**.
- Winner of the **Infosys RISE Insta Award 2021** for SAP data management and analytics practice.
- Runner-up, **National Informatics Centre** Atal Incubation IMAGINE inter-college business plan competition.
- Finalist, **Smart India Hackathon 2018**, organised by the Ministry of Education, Government of India.

BEYOND WORK

- Product management and resume-review mentor on **Topmate**.
- Led the business management and design team of the **GirlScript Foundation**, Jaipur chapter.
- Volunteered with ZEE and Teamwork Arts for the **Jaipur Literature Festival**, 2018 and 2019.
